

Spark ONTAP

Saving SparkPost events and related data on ONTAP storage never got this easier.

Spark ONTAP Architecture

Top-Class Disaster Recovery

- Our product is using top-class disaster recovery by integrating Netapp's ONTAP.
- We are using ONTAP's disaster recovery facility.
- The data is replicated to a disaster recovery server.
- If the primary server goes down, the secondary server can be used to read data.

Blast mass email campaigns

- Send hundreds of emails just by ONE click.
- The product has the capability to rerun campaigns.
- One can also rerun previous campaigns.
- Monitor your campaign in realtime!

Keep all your SparkPost with you!

- SparkPost only keeps your data for only 10 days.
- Our product saves ALL the Webhook data.
- Webhook data contains: emails sent, emails opened, and clicked link data.
- All the email campaigns are stored securely.
- All the data can be optionally encrypted.
- The data is available for doing: data analytics using BigData and other technologies.
